Bates operates more than 50 servers on the campus network. The network connects all academic buildings and residential units to a multiple gigabit Ethernet backbone with switched 10/100 megabit connections to each computer. NT servers and a connected storage array network support file storage and print services. Students are assigned a user account on the campus network, which provides access to academic software, file storage, electronic mail and the Internet. Storage for Unix systems is supplied on a COMPAQ storage array network. The most visible servers include:

ABACUS (General academic computing, E-mail)
