Double Majors

The double major required completion of all major requirements, including the comprehensive examination and/or the thesis, in two academic departments or programs.

Individual Interdisciplinary Major

Students may propose an individual interdisciplinary major should that student discover a well-defined intellectual interest that crosses one or more of the boundaries of the established fields of concentration. An interdisciplinary major involves a detailed program of study with courses drawn from at least two departments, but only one senior thesis and/or comprehensive examination.

Liberal Arts-Engineering Dual Degree Program

After three years of full-time study at Bates, qualified students may enroll in a two-year engineering program at Columbia University, Dartmouth College, Rensselaer Polytechnic Institute, Case Western Reserve University, or Washington University in St. Louis. Upon completion of this five-year program, students receive both an undergraduate degree in engineering from Bates College and a bachelor of science from the engineering-school affiliate.
